

BASALT COBBLES (V) FLAMED & BRUSHED

These cobbles showcase a distinctive surface marked by light speckling and natural mineral variation, as clearly seen in each tile. The Flamed/Water treatment not only emphasizes the stone's inherent grain but also enhances its tactile surface, making it both visually dynamic and practical. The modular size and straight edges allow for seamless installation, whether used in contemporary layouts or traditional stonework designs. Ideal for those seeking a grounded, architectural look rooted in natural beauty.
