

# NAZARE SPLIT FACE COBBLES

Nazare Splitface Cobbles feature a rough, textured surface that gives them a distinct rustic worn out look. The individual stones are small, roughly cubic blocks with uneven, split faces that add old-world charm to the floor. The edges are softened and naturally uneven, creating a surface that looks authentic and time-worn.

The color palette mixes cool greys with warmer tan and pale cream tones, creating a varied "salt and pepper" effect across the surface. The finish is matte and granular, providing a neutral but heavy backdrop that fits easily into different styles of decor.
