

ANTIQUÉ BELGIAN GREY TERRACOTTA

Antique Belgian Grey Terracotta cuts through the brightness of a space. It creates a cool, matte foundation that absorbs light, making the room feel instantly composed and relaxed. Footsteps land on a surface that feels lived-in, offering a gentle texture that grounds the daily activity of the home.

The palette drifts through smoke gray, blue-gray, and pale stone tones, marked by the darker kiln flashes of its past. The face carries a rustic worn out look, with shallow dips and scuffs that feel earned over time. The irregular edges soften the grid, making the floor look like it has been there for centuries.
